

YOUR JOB IS TO MANAGE THE PRESSURE. OUR JOB IS TO HELP YOU SEE THE LEAK.

PELICAN™ 3315PL

Glow in the dark, triple class safety certified.

PELICAN™ 3325

Safety certified, rear switch and economical.

PELICAN™ 2785

Safety certified, dual-direction (Main and Downcast) beam with high performance and long run time.

PELICAN™

3315PL / 3325 / 2785

3 NEW WAYS TO CONQUER THE DANGER ZONE.

Half of every day is night, but in the most dangerous environments the work goes on 24/7. Pelican's new Safety Certified flashlights turn night into day, even when explosive gases are present. Innovative safety features include a secondary downcast LED to reduce trip/fall accidents and glow-in-the-dark body material that can be seen even when off. And, of course, fully certified Class I/Division 1 safety approvals that allow use in the most extreme hazardous areas.
