

2000N

Nemo™

Dive Light

The Nemo™ 2000 Flashlight is o-ring sealed with a twist-on shroud and comes with a polarity battery guard tray that safeguards against dangerous "outgassing" of hydrogen from an accidentally reversed cell. It is powered by 3 C alkaline cells, submersible to 100 meters, and has an ABS resin body which resists chemicals, corrosion, and extreme temperatures. Unlike ordinary flashlights that produce a yellow beam, the Nemo™ 2000's incredibly bright Xenon lamp produces a powerful collimated white beam. Pelican's Nemo™ 2000 is the leader in quality and performance.

DIMENSIONS

Length	7.79" (19.8 cm)
---------------	-----------------

MATERIALS

Body	ABS
O-Ring	Ethylene Propylene
Lens	Nylon
Shroud	ABS
Contact Spring Retainer	Stainless Steel
